

TEAMARCH PORTFOLIO

2020

TEAMARCH is a Sudanese based architectural firm, established in 2013.

The company involves a team of multidisciplinary professionals with different backgrounds including; Architecture, Urban Planning, Urban Design, Building Services, Project Management and real-estate management and evaluation.

TEAMARCH believes that design is an integrated and participatory process.

Hence, our projects are participatory in the sense that our clients are part of our design team.

The integrity and the success of our projects is also attributed to the integration of different disciplines as early as possible in the design process.

Sustainability and cost effectiveness are key elements that are shared among all our designs.

TEAMARCH utilises the latest technology available in the industry and above all very intelligent and highly trained staff.

TEAMARCH works with computer simulation programs to analyse the building energy performance to foster our understanding to the importance of sustainability, and propose alternatives that can be cost-effective and energy efficient.

TEAMARCH developes complete design solutions for high-end villas, apartment buildings, compounds, commercial, leisure, office, industrial and urban planning projects.
